

5. A sanitary undergarment which is usable with an absorbent pad, with the absorbent pad having lateral extension wings thereon which are opposed to each other, said sanitary undergarment comprising: a panty having an external crotch portion; and an internal crotch portion; said external crotch portion and said internal crotch portion in combination forming an internal opening wherein the opposed lateral extension wings of an absorbent pad can be inserted therebetween and held in a secure manner by adhesive.

6. A sanitary undergarment which is usable with an absorbent pad, with the absorbent pad having lateral extension wings thereon which are opposed to each other, said sanitary undergarment comprising: boxer shorts having an external crotch portion; and an internal crotch portion; said external crotch portion and said internal crotch portion in combination forming an internal opening wherein the opposed lateral extension wings of an absorbent pad can be inserted therebetween and held in a secure manner by adhesive.

7. A sanitary undergarment which is usable with an absorbent pad, with the absorbent pad having lateral extension wings thereon which are opposed to each other, said sanitary undergarment comprising: a front body portion; a rear body portion; an external crotch portion; and an internal crotch portion; said external crotch portion and said internal crotch portion being of the same shape and size, said external crotch portion having a first end and a second end, said internal crotch portion having a first end and a second end, said first end of said external

 crotch portion being fixedly attached to said first end of said internal crotch portion, said second end of said external crotch portion being fixedly attached to said second end of said internal crotch portion, said external crotch portion and said internal crotch portion in combination forming an internal opening, said front body portion having an upper waist section and a lower crotch attachment section, said rear body portion having an upper waist section and a lower crotch attachment section, said lower crotch attachment section of said front body portion being fixedly attached to each said first end, said lower crotch attachment section of said rear body portion being fixedly attached to each said second end, said front body portion having a first side section and a second side section, said rear body portion having a first side section and a second side section, said first side section of said front body portion being fixedly attached to said first side section of said rear body portion, and said second side section of said front body portion being fixedly attached to said second side section of said rear body portion,

whereby:

each said portion in combination form a sanitary undergarment which is in the shape of a panty, said panty having said internal opening wherein the opposed lateral extension wings of an absorbent pad can be inserted therebetween and held in a secure manner by adhesive.

8. A sanitary undergarment and absorbent pad in combination comprising: a front body portion; a rear body portion; an external crotch portion; an internal crotch

 portion; and an absorbent pad; said external crotch portion and said internal crotch portion being of the same shape and size, said external crotch portion having a first end and a second end, said internal crotch portion having a first end and a second end, said first end of said external crotch portion being fixedly attached to said first end of said internal crotch portion, said second end of said external crotch portion being fixedly attached to said second end of said internal crotch portion, said external crotch portion and said internal crotch portion in combination forming an internal opening, said front body portion having an upper waist section and a lower crotch attachment section, said rear body portion having an upper waist section and a lower crotch attachment section, said lower crotch attachment section of said front body portion being fixedly attached to each said first end, said lower crotch attachment section of said rear body portion being fixedly attached to each said second end, said front body portion having a first side section and a second side section, said rear body portion having a first side section and a second side section, said first side section of said front body portion being fixedly attached to said first side section of said rear body portion, and said second side section of said front body portion being fixedly attached to said second side section of said rear body portion, said internal crotch portion having a top surface and a bottom surface, said absorbent pad comprising: a top surface; a bottom surface; a first lateral wing extension; and a second lateral wing extension; each said extension being opposed to each other, said bottom surface of said absorbent pad is covered with adhesive by a removable strip, said first lateral wing extension having a bottom surface, said second lateral wing

 extension having a bottom surface, said bottom surface of said first lateral wing extension is covered with adhesive by a removable strip, said bottom surface of said second lateral wing extension is covered with adhesive by a removable strip,

whereby:

when each said removable strip is removed then said bottom surface of said absorbent pad can be positioned onto said top surface of said internal crotch portion and held in a secure manner by said adhesive thereon, with each said lateral wing extension then being folded and inserted into said internal opening,

whereby:

said bottom surface of each said lateral wing extension is secured by said adhesive thereon to said bottom surface of said internal crotch portion within said internal opening.

EXAMINERS REMARKS

1. "The abstract of the disclosure is objected to because terminology which can be inferred, i.e. "Herein.... is", should be avoided. Also, is the terminology "sanitary undergarment" a trademark? If not, the quotation marks should be deleted. On line 5, "there between" should be —therebetween— and on line 6, "residue" should be deleted. Correction is required. See MPEP § 608.01(b).

The prior art cited in the specification, e.g. page 3 and page 12, has been noted but will not appear on the front of the patent, if any, since such citations do not comply with 37 CFR 1.56, 1.97 and 1.98.
